OPERATIONAL ADVANTAGES

Veteran-led, deployment-ready. Marine infantry ownership (2nd Light Armored Reconnaissance Bn, Camp Lejeune): small-team leadership, rapid mobilization, and sustained operations in austere post-storm conditions. Direct owner responsibility for execution.

Operational assets. company LMTV cargo truck, HMMWV, work trucks, equipment, and hands-on personnel.

Technology-enabled transparency. iFIXED Command Center for project tracking, photos, progress updates, and reporting.

Flexible contracting. defined federal, state, local, commercial, and subcontracted scopes.

Practical execution. small-business responsiveness without administrative layers.

Financial readiness. insured to \$1.5M (Hiscox); \$1.5M bonding capacity, subject to surety approval; debt-free operation.

Construction, facility services, disaster recovery, and logistics for government buyers.

IFIXED LLC combines hands-on construction experience, operational vehicles and equipment, and technology-supported project management to provide efficient, accountable service. We are available to federal, state, and local agencies, prime contractors, and emergency-management organizations through direct contracting, subcontracting, and teaming. Field teams deploy on short notice and operate in post-storm conditions without established infrastructure.

CORE CAPABILITIES

Construction & facility maintenance

- Interior renovations and facility repairs
- Commercial and residential remodeling
- Flooring installation and replacement
- Interior and exterior painting
- Carpentry, millwork, trim, and cabinetry
- Doors, hardware, and closers
- Drywall, ceilings, and finish work
- Accessibility (ADA) improvements and fixtures
- Property rehabilitation and punch-list completion

Disaster recovery & emergency support

- Post-storm and hurricane property and facility repairs
- Emergency facility restoration
- Site preparation and protection; temporary repairs and weatherproofing
- Recovery materials and equipment support
- Debris and recovery support; field crew coordination
- Rapid mobilization; veteran-led teams for austere, infrastructure-down conditions
- Support to federal, state, and local disaster-response operations
- LMTV and HMMWV for post-storm site access and hauling

Logistics & field operations

- Fleet-supported materials and equipment movement
- Jobsite logistics and deployment coordination
- Personnel, supplies, and equipment support
- Staging, last-mile, and emergency supply movement
- Field support for emergency and infrastructure projects

Each scope is confirmed against licensing, crew, equipment, and schedule before any commitment. Specialized or licensed trades are performed only where authorized. No government award or past-performance history is implied.

TECHNOLOGY & DEVELOPMENT PROGRAMS (NOT CURRENT SERVICES)

PROTOTYPE TESTING

Mongoose: environmental detection & response — Applied platform for invasive-species detection, geospatial surveying, risk identification, automated alerts, and coordinated field response. Prototype testing and integration development underway; agency-system integration required. Available for partial-scope and pilot participation.

RESEARCH & DEVELOPMENT

Military vehicle modernization & energy storage — Modular HMMWV electrification, engine-off mobility, energy storage, and retrofit systems for military, disaster-response, and field operations. Physical prototype validation and engineering approval remain necessary.

PLANNED

Manufacturing & fabrication expansion — Assembly, prototype fabrication, vehicle modifications, and manufacturing capability, including exploration of regulated FFL-related operations, contingent on all required authorizations and licenses.

These development programs are not represented as existing production services or awarded government contracts.

Send the scope. We'll give you a straight answer.
